September 2023 - December 2023

TRIP TIK
The journey as a web developer intern was a rollercoaster of learning, growth, and accomplishments. From day one, I was immersed in real projects that required me to apply the skills I had acquired in the classrooms. The experience was both challenging and rewarding, as I had the opportunity to work on a diverse range of projects, from front-end design to back-end functionality.
One of the most significant aspects of the experience was the mentorship I received from the senior developers. Their guidance was instrumental in helping me overcome roadblocks and refining my coding practices. They encouraged me to think critically, troubleshoot independently, and always strive for efficient and elegant solutions.

February 2024 - August 2024

WAY UP
Created project-specific teams, recruiting cross-functional talent to meet unique project needs and goals.
Delivered on unique client website/application visions, leading interface design and development to ensure optimal function.
Monitored and maintained existing products and applications to support ongoing performance.
